### Summary of Evidence

*Summarize the evidence compiled to be presented to evaluator with a brief analysis.  
Attach additional pages as needed.*

To teach all students, I emphasize small group work in my classroom. I group students into small groups of between 3 and 5 students, and use student test score data to inform my grouping. During common planning time once a month, I review student groups using the most recent formative assessment data available, and change groups based on students' progress, as necessary. Attached is an example of what my groups might look like in a given week.

To engage students with the material more, I also use a series of fun math activities that I have collected from my colleagues and found using resources online. An example is attached.
